It's Not Long Now 'Til New Cafeteria Is a Reality Here

Some time between semesters the new cafeteria will open for business under the management of the present caterer, LaSalle Catering Service.

Although the number of people employed throughout an average day will vary, there will probably be between three and four persons on duty at the noon and evening rush hours. The hours of operation will be similar to those that are now in force.

Although the date of arrival of new furniture for the dining room is uncertain, 88 persons can be both fed and seated at one time, with the new facilities in full use.

All of the equipment that will be installed in the kitchen is to be of stainless steel. This will include a serving counter with hot trays, a disposal counter, and a preparation counter. There will also be a soda bar with freezer, two refrigerators, and a large combined oven range or grill, burners, and french fryer. The kitchen will even have its own hot water heater.

Ground Breaking Is Near For New Armory

With the awarding of a contract for $227,333 to the Calumet Construction Co. of Hammond by the Indiana National Guard, the construction of the new Armory to be placed at 173rd Street and the New York Central tracks in Hammond moves a step nearer to completion.

This new building unit occupies three acres of ground donated to the National Guard by Purdue University. According to the President of Calumet Construction, Richard Gardner, it will be about twenty-five days before actual digging will begin.

The new unit will measure 117 feet by 90 feet and will house a joint drill hall and basketball floor, seven classrooms, a library, locker rooms, storage rooms and a kitchen plus three offices. While Purdue will have use of the building during the daytime and four evenings per week, the balance of the remaining time will be taken up by the National Guard. The unit of the National Guard which will use the building is Company C of the 113th Engineers Battalion. Although originally housed at the Armory in the City of Whiting, the Armory building was recently sold to the same city and the National Guard unit was then forced to move.

Covering special work to be done by Purdue University and the State of Indiana, there is still one more contract to be let for the construction of special locker rooms and shower facilities for University uses .It also provides for additional curbs and sidewalks.

In an interview with Millard E. Gyte, director of Purdue's Calumet Center, it was stated that the new Armory will greatly aid in expanding the Center's enrollment by allowing for complete classes in physical education. Other advantages include space for special conferences, seminars and adult classes, and extra-curricular activities for the whole student and faculty bodies. The presence of this new building will also provide more adequate space for an off-the-street parking program here at Purdue.

The contract was signed on the behalf of the National Guard and the Department of Defense by Col. J. D. Friday and Mr. Gardner for Calumet Construction Company.

Dr. John S. Karling, Outstanding Biologist, Will Speak at Center in February

Dr. John S. Karling, professor and head of the Department of Biological Science at Purdue University, will speak to the Calumet students February 15, in Room 111, at 12:10 p.m.

Dr. Karling is an outstanding mycologist and is considered an outstanding authority on the group of fungi known as the Chytridiales. He has served as an officer in many societies in the field of biology.

The speech here at Calumet Center will be on "New Developments in the Field of Biological Science." Students will be excused from 11:00 a.m. classes at 11:40 a.m. to give them time for lunch.

Practical Nurse Grads Hear Dr. Eggers

Purdue's graduating Practical Nurse Class heard Dr. Henry Eggers of Hammond deliver a commencement address for the exercises held in Hammond High School Auditorium last Thursday evening.

Besides being a member of the Hammond School Board, Dr. Eggers was one of the originators of a Lake County practial nurse program. Since the program's inception, 147 persons have been enrolled in the course. The attending students came from all sections of Lake and Porter Counties in Indiana and a few from Cook County in Illinois. While the present graduating class has 25 members, the first class of 38 graduated last fall.

Requiring 48 weeks to complete, the course ran 16 weeks at Purdue's Calumet Center and the remainder of 32 weeks were spent at the various hospitals in Lake County.

Music for the evening was provided by St. Margaret Hospital Glee Club. Professor Von Roy Daugherty, of Purdue's Technical Extension Division, awarded the diplomas. The graduation program was open to the public.

NEW FACULTY ADDITION

Born to Mr. and Mrs. Kenneth Wilson Monday morning at 4:14 o'clock, Jennifer Ann Wilson, weight, 7 pounds, 2 ounces. Report on condition of father is pending.

SOMETHING NEW IS BEING ADDED

Extra! Extra! Something new is being added in the next issue of **The Boilermaker!** It is a new roving reporter-type column called "A Penny for **Your** Thoughts". For each issue of **The Boilermaker** a question will be selected, and several students will be asked their views on the question. Their answers will be printed in the following issue of **The Boilermaker.**

The idea for this column was obtained when two of the Center's secretaries, namely Miss Sandra Carlson and Mrs. Audrey De Vries, were interviewed by Mary Shaber, creator of **The Region Journal's** popular column "Two Cents Worth." Their answers to Mary Shaber's question were printed in The Journal, and each secretary received two bright, shiny pennies for her answer.

Watch for this new column "A Penny for Your Thoughts" in the next issue of **The Boilermaker,** and if any of you get any interesting ideas for questions that could be used for the column, please turn them in to the Boilermaker.

P.S. No money will be given for answers which appear in **The Boilermaker.**

Serving counter of the new cafeteria at Calumet Center.

Orientation Program at Purdue Center Will Include Tests, Information for Newcomer

The spring orientation program for new students entering in February or second semester will be held January 21 and January 30.

Orientation or placement tests will be held January 21, Saturday for all new students and for those students who did not complete their orientation tests last fall, or who did not take any orientation tests in the fall. These tests will be given from 8:00 a.m. to 3:00 p.m on Saturday.

All students must complete these tests before finishing their work at Purdue and, therefore, should take advantage of the first opportunity to take them.

The remaining part of the Orientation program will be held Monday, January 30, beginning at 9:00 a.m. This phase of the orientation program is planned to acquaint the student with the Calumet Center and its program, the rules and regulations of the Center, student services and student activities as they are conducted here at the Calumet campus. Also, various suggestions and hints on the techniques of studying and reading will be presented during the morning program.

The afternoon program will consist of an informal lunch with various faculty members in the new student cafeteria. Then a general meeting will be held to explain the advisory system used here at the Center to help the student, especially during pre-registration. Pre-registration will complete the afternoon program.

Mr. Paul Meier expects the Spring enrollment to remain in the same numerical bracket as the fall enrollment, approximately 2,300.

There will be a special Speech Class offered for the representatives of the Calumet area railroads.

Pointed for Purdue

January 26, 12:30 noon—Purdue Sings for you. Porter gym. "Fun with Music" led by Al Stewart.

January 27—The day you can sell your used books at the bookstore.

January 28—End of semester.

January 30—Registration for Beginning Freshmen.

January 31 and February 1—Registration for others.

January 31—LaGrange—Home.

February 1—Classes begin.

February 3—Pep Rally.

February 4—Tourney.

February 6—Thornton—Home.

February 7—Thornton—Home.

February 11—Valentine Dance.

February 14—Wright—Home.

February 15—Last day for registration.

February 18—Ball State—There.

February 21—Kendall—Home.

Student Efforts Make for Real Winter Wonderland

Purdue University Calumet Center held its annual winter formal last December 22.

For this gala occasion the student lounge depicted a truly beautiful Winter Wonderland. The scene was complete with snowmen, evergreens, and Santa Claus' house. Approximately seventy couples danced to the music of Fred Robert's and his orchestra.

Committee chairmen were Dale Griesel, general chairman; Ed Wright, tickets; Dale McCullum, decorations; Don Dunklebarger, chaperone; Carolyn Barnard, refreshments; Bill Grace, publicity; and Charlene Chastler, clean-up.

Refreshments were served throughout the evening in a candlelighted room where Christmas carols were played. The guests enjoyed the array of home-made cookies and delicious punch.

The chaperones for this festive evening were Mr. and Mrs. Gyte, Dr. and Mrs. Cone, Mr. and Mrs. Combes, and Mr. and Mrs. Zacher. Other members of the faculty who were in attendance were Mr. and Mrs. Meier, Mr. and Mrs. Relich, Mr. and Mrs. Joly, and Mr. and Mrs. Gallet, Mr. and Mrs. H. A. Williamson.

THANKS, MRS. SCHMID

The Boilermaker staff extends a voice of "Thanks" to Mrs. Merle Schmid for giving us a hand at typing during the usual last-minute rush.

Flannery, Rainey Sponsor Physics Club

Mr. Flannery and Mr. Rainey are sponsoring a Physics Club for high school students to inspire future college students to a career in Science and Physics and to create an interest in all Science.

Anyone can attend these meetings, but qualifications for membership are at least one year of Chemistry or one year of Physics.

Mr. Flannery stressed the advantages of this club as a "helping hand" for interested students. Prof. Schlosser directs and aids students in their endeavor for a grasp of the chemical science.

At the present time the officers of this club are as follows: Wayne Wickelgren, president Hammond High; Veidre Sitnick, vice president, Morton High.

Through the strong efforts of the officers, the club has grown both in numbers and interest.

Mr. Rainey is also sponsoring another club in the interest of Science. This time, **Electrical.** This club is designed to help TI students and electrical engineering students to better understand electricity and help them build electrical devices for their own uses. Further plans will be published later.

Starting next issue, a new column will be added. It will be entitled "The Senate Speaks" and will contain Student Council news.

Where Do We Go From Here?

Although in the past years the editorial page was frequently restricted to reprints from other publications or articles using oft-repeated themes and laden with platitudes, it is the belief of your editor that the editorial page should function at least as a forum for the discussion of ideas or as an active criticism of student problems.

Coupled with the Student Council, this newspaper intends to exercise its power of the press by criticizing or praising student actions as the case may be. It certainly will not neglect its responsibility along the same lines in regards to the faculty or administration. The idea behind this action is that as long as the students and their representatives recognize that certain problems exist, they can exert themselves to correct or remove the problem. It is only when they fail to do so so that they will find opposition from the faculty.

A problem which is troubling the faculty at the present time is the continuous and gross abuse of card playing in the lounge. Nobody is against this form of entertainment, but there should be a sensc of moderation. The results of this entertainment are not good as shown by the following:

(1) It makes for a crowded lounge at the time of changing classes, and especially at the noon and evening meals.
(2) Many of those that have been seen playing cards arc not at their best scholastically.
(3) It does little to give a true picture of the many students who have left the high school behind and are now in college.

This problem has progressed from one of being tolerated to a point where it is now very irritating and must be mitigated. Before the faculty should be forced to take any action, the students and their representatives should set about correcting this condition on their own.

Even though you or your relatives are paying for your education, Purdue University has extended to you the privilege of getting that education, and your responsibility is to see that such an opportunity is not forsaken.

Soc-Hop Cancelled; No Future Plans

Scheduled for January 10th after the Elgin basketball game, it was with considerable regret that the Soc-Hop was cancelled.

Although there was keen disappointment, the faculty had two reasons for cancelling this activity. The primary reason was that the activity, although a Purdue activity, was to be held on property other than Purdue's and thus out of the Center's jurisdiction. The secondary reason was that it was to be held on a school night and would possibly detract from the attending students' classroom performance the next day.

If the primary objection could have been overcome, it is believed that the secondary would not have presented as a great a problem. Unless there is an answer to the former right now, it will have to depend for its solution on the construction of the Armory with its adequate amount of space for such extra-curricular activities. This matter of space is a very vexing problem at the present time in regards to many college matters. The latter could probably be solved by the students themselves if those who were low scholastically would correct their deficiencies. An attitude like this would conceivably demonstrate to the faculty that a free night during the week was not a scholastic deterrent. Providing these two objections could be met, the majority of the faculty will not stand in the way of your extra-curricular activities.

Have you noticed that big grin on Dr. Tuckey's face lately? You may have guessed the reason. That's right — a 6-pound 15-ounce boy, Alan Wayne, born January 12. Baby, mother and father doing fine.

Memorial Fund Continues to Grow

The Mark P. Anderson Memorial Fund now stands at $448.50. The committee in charge of the fund is hopeful that a $500 mark will be reached soon.

At a recent meeting of the supervising committee it was decided to keep the fund perpetually open for additional bequests that may be made from time to time.

Persons pursuing studies in the field of natural science, especially biology, will be given preference as applicants for loans from the Anderson Memorial Fund.

Another Message For TI Students

I don't want to say, "I told you so", but - didn't you have a good time at the Christmas Formal? Seriously, everyone was happy to see the number of TI men at the dance. This is a "pat on the back", but don't let it go to your head! ! Now that you see what goes on at these functions - try to attend all school affairs. It's still school - but no homework.

— Around the Lounge —

By Waldo

Congratulations are in order for our basketball team which is really starting to go to town. And let's not forget the cheer leaders who are also doing a splendid job. What are your reactions on a huge bonfire pep rally? We could kill two birds with one stone on this deal. One would be the pep rally, and the other would be the "bonfire" of all that garbage on the surveying field . . . Did you know that one of the four states is named after an Irishman? It's the western state of "O'Regon". . . . . There have been a lot of improvements made these past years, but I've not heard of anyone carrying $300,000 liability insurance on a horse and buggy. Quite a few of our faculty and students spent the Christmas holidays in the Florida area. One—Mr. C. T. asked the whereabouts of an old fashioned what-not at the hotel in which he was staying. The clerk told him to "go around back, pass the kitchen, and keep on going; you can't miss it" . . . Oh well they've got quite a few nice bars in Florida . . . . Back to the Gopher Hole. . . . What is it that Carol won't say about John? . . . . Who is the wide-eyed girl that's going after Harry? And by the way, have you heard that's the matter with Harry? . . . . Who, Who, Who, is that luscious, broad-shouldered brunette seeking our beloved editor? . . . Wonder if Shirley has found out why she is so happy. . . . And fellas, Pat was so happy because there were so many boys at the record dance on the fourteenth. The next dance will be more widely publicized. All those at the dance had a good time and so did one of the chaperones who donned a Black Derby (a small black derby) and went around scaring the ladies. Right Mr. M? They enjoyed it though. Hope I see everybody again next semester and Happy Easter. Closing thought: try to be like a pin, whose head keeps it from going too far.

Hours For Playing Restricted in Lounge

During the senate meeting on January 18, it was decided that card playing should be prohibited in the lounge between the hours of 12 and 1 p.m.

This regulation may be modificd when the new cafeteria is put into operation and there is a greater seating capacity. There will be a student officer in the lounge every noon to enforce this ruling.

T.I. Institute Will Graduate Electric Group

The Technical Institute will graduate the following shortly, men who will apprentice with Electrical Union 697.

The graduates are listed below:

Richard Balka, Radovan Birac, Amos Blythe, James Boney, William Buckler, Joseph Bukovich.

Albert Cacini, Jack Clark, Ervin Dechnik, Jack Farn, Jack Hamilton, Eugene Kasper, Thomas Kummerer, Vardgas Maloian.

Paul Martin, Raymond Napiwocki, Howard Ockander, Gerald Pels, Donald Perkins, Robert Reichanadter, Stan Reznick, William Reznick, Don Royer, Dan Santerior, William Sawyer, and Walter L. Smaron.

THE STUDENT'S MAIL-BOX IS LOUNGE ADDITION

Have you noticed the students' mail-box in the lounge? If not ,take a look at the north wall. Thanks to the work of Wilfred Buchanan and Gerald Fisher, who built it, and to the Student Council, who purchased the materials, we now have a way of communicating with each other.

The mail-box is very simple to use; place the note in the pigeon hole above the first letter of the last name of the person for whom the note is intended. On the outside of the note should be the recipient's name and the date. This is necessary because weekly checks are made, and outdated material will be destroyed. The student should develop the habit of checking his mail every day.

The condolences of both faculty and students are extended to Dr. L. W. Cone, who lost his father during the holidays.

Loose Rivets In the Boiler

By John Millard

The record dance, recently held in the lounge, was not too well attended. We can do better, and we must next time, because these dances are for a cause-the benefit of the cheerleaders. A few of you may have been disappointed that the soc-hop after game idea was killed by the faculty, but they had valid reasons for killing the idea. The soc-hops can be held next year in the armory (which IS now under construction), along with many other events which won't work now because there is no space available, but there will be in the new building.

The Jan. 31 game is one very few of us can afford to miss. As you know, the semester ends Jan. 28, which places the 31st on time. Don't miss this one. Make a date now for that Feb. 4 Tourney. It is a Saturday event, and worth taking the day off to go see.

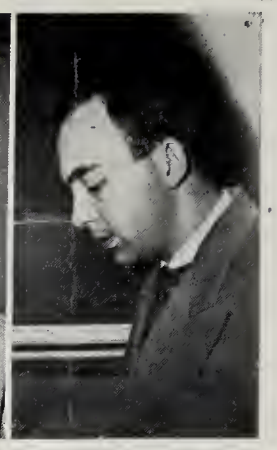
Final pairings are not out yet, but a good guess is that we will play Indianapolis in the elimination game, and the winner of the Ft. Wayne-Michigan City game in the final. The tourney traditionally starts with a 10:00 A.M. game, followed by a 11:30 game (both elimination contests). This is the morning session, followed by a free afternoon, during which time one can enjoy a casual lunch at the Union (a very nice place, and almost deserted at mid-year vacation time), followed by a walk, or drive around the Campus till supper time. For supper, either the Union, or one of the many fine restaurants near the Campus is suggested for your enjoyment. At 5:00 or 6:30, the final game is played, (which, the past has proved it can take 5 overtimes to settle).

Last year, we took second place; this year we have only one major source of competition foeseeable at this time. That is the strong Indianapolis Center team. The prospect for this year is a great tourney, one which will be worth your time and trouble to attend.

Make your plans to drive now, and get as many of your friends to go along as you can. When you know for sure you are going, and how many are going with you, put a sheet of paper on the bulletin board, with your name, and the number of spaces you have open for passengers.

Carloyn Barnard

Jerry Capusan



Dr. Warren Seibert

Purdue Personalities...

Carolyn Barnard ·

One of the few girls here at Purdue is Carolyn Barnard, who I'm sure nearly all of you know. But in case some of you don't, here is just a brief introduction:

Carolyn was born in Hammond and has lived here all her life. She attended Edison Grade School and Hammond High. At Hammond High, Carolyn, a very active person, was in a great many activities, among which were the Latin Club, Girl's Athletic Club, Monitors Association, and National Honor Society.

She was graduated from Hammond High in 1954 and enrolled for her first year at Purdue Extension where she finally decided to major in Mathematics.

Besides being a domestic arts enthusiast (both cooking and sewing) Carolyn enjoys both playing and watching baseball and playing cards.

* * *

JERRY CAPUSAN

Jerry, a sophomore here at Purdue, was born and reared in Gary, Indiana.

He attended Gary Froebel High School where he was very active in the Math Club, Latin Club, Dramatics, and the Junior Honor Society. After graduation, Jerry attended Indiana University for one year, but quit to enlist in the Navy.

During his four-year naval career his nickname, Cappy, followed him from Great Lakes to Pensacola, Florida, Memphis, and San Diego. In the Navy he was an Aviation Electronics Technician.

When released from the Navy in September of 1954, Jerry, not one to waste time, began his study for Electrical Engineering here at Purdue. Along with going to school, Jerry does clerical work at Youngstown.

One of Jerry's interests, traveling, has taken him to Mexico. Besides traveling, he enjoys hunting and fishing, dancing, music, reading, and movies. His main interest will always be women - according to Jerry.

****

DR. WARREN SEIBERT

One of the several new additions to the faculty this year is Dr. Warren Seibert. He comes to us from Carbondale in southern Illinois where he was born and where he grew up.

Following his service as a Naval Radar Operator in World War II, he enrolled at Southern Illinois University. There he received his B.S. degree in Education and his M.S. degree in Guidance and Counseling. After that he began study for his doctorate at Purdue. His doctor's thesis was written on factors related to economic knowledge and attitudes of a representative group of high school people. This degree will be awarded at the end of this semester.

He married a girl from his hometown, a childhood sweetheart. They now have one child, a little girl of three, Diane by name.

Dr. Seibert is an enthusiastic hunting and fishing fan, but his major interest still is psychology. The great psychologist William James would call him a "tough minded" psychologist because he is so fascinated by the statistics of psychology.

Meet Your T.I. Instructors

MR. NICHOLAS RELICH

Starting in 1943, Mr. Nicholas Relich taught in the War Training Program and TI in Gary. From 1948 to 52 he was a full-time instructor at the Indianapolis Campus of Purdue; since then he has joined our staff here in Hammond and is teaching Math, Mechanics and Statistics.

Mr. Relich received a B.S. degree in Chemical Engineering at Illinois, a Master's degree at Purdue, and is now working on his Doctor's degree at the University of Chicago.

For hobbies, Mr. Relich takes part in civic and educational organizations. He is now serving as Chairman for the Calumet Unit at the American Society of Quality Control.

YOU SHOULD HAVE BEEN THERE, PARDNER

Saturday evening, January 14, 1956, the Student Council sponsored a record dance. Approximately 60 people were in attendance. Proceeds from this dance are to be used for the cheerleaders' outfits. Cuff Nichols, Charlene Chastler, and Ed Wright worked with Mrs. Cone as a committee for this fund-raising platter shuffle.

Purdue Takes Elgin In Tow 70-69

Led by brilliant defensive play by their spark-plug Jerry Kaiser, the Purdue Boilermakers fought to the finish and were rewarded with a hard fought victory over Elgin Community College, 70 to 69.

During the first half, the Calumet boys seemed to work together better on the floor than they had previously. Their passes were sharp and quick, their shooting was above average, and their spirit seemed very high.

At the half time, P.U. enjoyed a 34-30 lead which they upped in the early minutes of the second half to 40-30. At this point the boys seemed to relax and awoke to find Elgin right on their heels.

With 53 seconds to go, Purdue hit a field goal to go ahead 68-67. After setting up their offense with a double block, Rugh of Elgin calmly pumped in a 20-footer to make the score 69-68 in favor of Elgin.

With 12 seconds to go, Chuck Jonas got the pass on a fast break. He jumped from ten feet out and his shot was a little long. Leaping high, Jerry Kaiser grabbed the rebound and put through the final basket. Elgin did not have time to get the ball in play as the buzzer sounded. The scoreboard read: Purdue 70, Elgin 69. A terrific game!

In the Elgin game, our team showed us that they could make use of the great potential they have.

Top scorer for the evening was Dougherty of Elgin with 30 markers. Lannin was high scorer for Purdue with 20. He was followed by Kaiser, Jonas and Easter with 14 markers each.

Jerry Kaiser seemed to have the old eye back as he swished 7 out of 17 from out for a .412 shooting percentage. If Jerry can keep this up, a zone defense will not be so troublesome as it has in our earlier games. Keep up the fine work boys; you played an excellent game.

Purdue	F.G.	F.T.	P.F.	T.P.
Lannin	8	4	2	20
Easter	5	4	2	14

Faculty, Students Reflect on Program of Color, Dancing Music

Children from the Sherpetosky Dancing School performed native dances, in costume, of Spain, Mexico, Hungary, and several other countries. Color, castanets, and cartwheels were much in evidence as dancers whirled and leaped to the intricate rythms of the phonograph, as stellar entertainment for students and faculty assembled in the Lounge to enjoy the colorful Christmas program.

Next on the program was a short talk by the Rev. Mitchell of Our Lady of Guadeloupe. Mentioning his work with prisoners, the Reverend pointed out that as human beings "we are all one family and that at Christams time, as at every time, we should remind ourselves of Christ and of the courage and moral firmness which his life represents."

Afterwards, students and faculty sang carols, and, to end the program, everybody sustained himself on the eve of the long vacation with coffee and doughnuts.

Attendance at our games has been rather light, and although our team has not posted an outstanding record, it has not been beaten badly, nor have any of the games been runaways. They have all been well worth watching. So let's get out and watch a couple of them.

JOLIET BOWLS OVER PURDUE FIVE

Once again Joliet's height and superior offense defeated the Purdue team. At the first meeting of the two teams, Joliet came out on the top of a 95-51 score. Tuesday night, Joliet ran to an overwhelming 104-61 victory

In total offense, Joliet took 69 shots to Purdue's 67, the difference being that Joliet hit for 41 and a .600 percentage whereas Purdue hit only 25 for a .370 percentage.

Joliet's first Five all scored in double figures, as they hit for 21, 19, 16, 15 and 12 points apiece.

Purdue was led in scoring by Lannin with 17, Kaiser with 12, and Jonas with 11.

As the paper will not be published again before the University Tournament between the Purdue Centers, we wish coach Bob Hayes and the Boilermaker squad success on Feb. 4. Bring back the trophy!

Special Notice To ALL Purdue Students

This "notice" is an entertaining one - In fact that is what it's all about! ! ! At 12:30 January 26, Mr. A. P. Stewart, director of Purdue University Musical Organizations, and John Farley will present a musical program FOR YOU at the Porter School Gym, entitled "Fun With Music" by Al Stewart.

From all reports this is going to be a very entertaining program with a very interesting M. C.

Morton Jr. College Downs Purdue 74-57

Morton Jr. College of Cicero drowned Purdue's hopes of becoming a .500 ball club as they dropped P.U.C.C. to their third loss in four starts with the score 74 to 57.

Once again, Purdue could not find the range from the floor as they compiled a .284 shooting percentage. The Boilermakers were guilty of quite a few bad passes and general miscues.

Kampe scored first for Morton on a 15 foot jump. Purdue quickly knotted the score at 2-all. P.U.C.C. then ran to an advantage of 6-3 but saw their lead melt as Morton found the mark and went ahead 9-7. Morton then turned on the steam and scored 15 points to Purdue's 4 to go ahead by 24 to 11 and then 29 to 12.

With Morton leading 37-17, the Boilermakers warmed up the cold nets by scoring 10 points at the end of the first half which ended with Morton on top 37-29.

Morton came back early in the second half with a rally to match that of Purdue as they ran their lead to 20 points at 53-33. Both teams then exchanged baskets with the score reading 72-49.

Purdue closed the final minutes of play by scoring 8 points to Morton's 2. Final score, 74-57, in favor of Morton.

Jerry Kaiser and Chuck Jonas led the scoring for P.U. with 19 and 16 points respectively. Kolfa and Logan scored 18 and 17 points for the winners.

Thornton Spoils Locals Hope For Victory

At the start of the game, it looked as though Purdue was going to get its second win in a row as the Boilermakers ran to a quick 15-4 lead.

Thornton then began to find the range and cut the advantage down to 29-26 as Ed Creach hit four out of 5. Thornton then tied the score and went ahead at the half 35-33.

Purdue's attack was led by Chuck Jonas with 13 points but, in doing so, he picked up four personals.

Purdue started the second half with two quick baskets to go into the lead at 37-35, but Jonas picked up his fifth personal and was through for the night. In the meantime Lannin had four fouls and Kaiser had three.

With 15:33 remaining in the second half, Jonas fouled out and shortly afterward, Lannin was sitting on the bench. Substitutes Steve Sawochka and Al Janc played good ball as they tried to take up the slack.

In the last two minutes of play, Thornton pushed through 10 points to our 2 points as they used their fast break effectively. The final score was Thornton 87, Purdue 64.

High scorers for Purdue were Easter, Givan and Jonas as they scored 18, 17 and 16 points respectively.

The boys of Harvey were led in scoring by Ed Creach who hit 10 out of 18 field goal attempts and 11 of 12 charities for a total output of 31 points. Creach was followed by Backman and Devore with 15 and 14 points respectively.
